

① Encode

$$P = D_0 \oplus D_1 \oplus D_2$$

$$Q = g^0 D_0 \oplus g^1 D_1 \oplus g^2 D_2$$

② Two blocks die (D_0, D_2)

$$P_{xy} = P \oplus D_1 = 3$$

$$(= D_0 \oplus D_2)$$

$$Q_{xy} = Q \oplus g^1 D_1 = 0$$

$$(= g^0 D_0 \oplus g^2 D_2)$$

2 unknowns, 2 equations

③ Recover on $GF(2^3)$

$$D_0 = \frac{g^2 P_{xy} \oplus Q_{xy}}{g^0 \oplus g^2}$$

$$= \frac{7 \oplus 0}{1 \oplus 4} = \frac{7}{5} = 7 \cdot 2 = 5$$

$$D_2 = P_{xy} \oplus D_0 = 3 \oplus 5 = 6$$

$$D_0 = 5$$

$$D_2 = 6$$
